General description

Phone Wallet for PC is freeware software that allows keeping safe your confidential information like passwords, logins and your financial information on your PC. You have a possibility to set a password and change it any time for security reason. You can use the same information on your mobile and on your PC and transfer data between the clients. Using strong encryption the data become unavailable even after making a disk dump.

PC client of Phone Wallet is compatible with Microsoft Windows XP and Microsoft Windows Vista.

How to install Phone Wallet for PC

Please run PhoneWallet.exe in order to install the software. Follow the installation instructions during the installation process.

Working with Phone Wallet for PC

How to start

Phone Wallet for PC Application can be opened in following ways:

- Choosing the menu item: Menu Start → Programs → Phone Wallet for PC
- Clicking a mouse button on an Icon on the Toolbar or on the Desktop

General information

Phone Wallet for PC application is meant to keep your confidential information safely on your computer. You have a possibility to set a password and change it any time for security reason.

The application is fully customizable according to the users needs.

When the application is started for the first time the password query will appear. This password is used to enter Phone Wallet File and to protect the confidential information, so it should be something that can be easily remembered:

Phone Wallet for PC data is sorted into folders. Every folder has unlimited count of records in it.
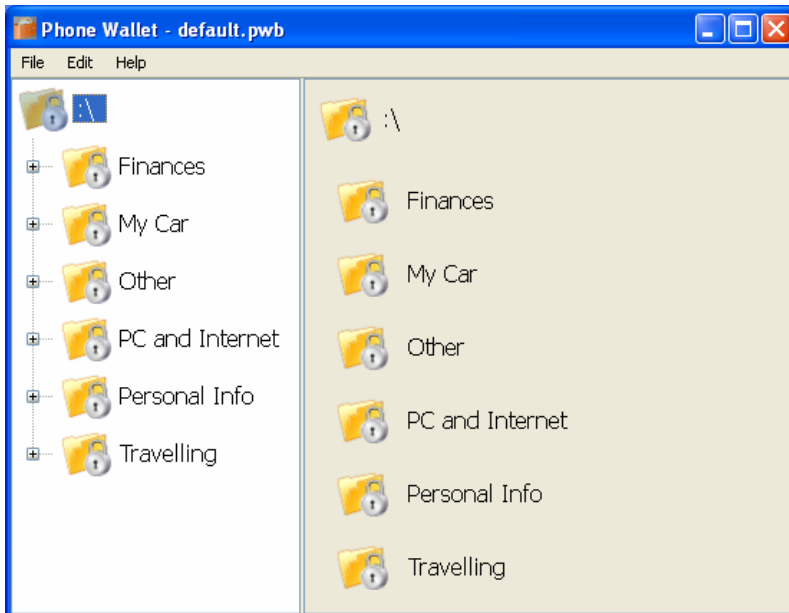

Main screen of Phone Wallet for PC application looks like follows:

There are two panels in the main screen: left panel is for choosing items and the right panel is for editing ones. There is a possibility to customize any folders or records according your needs.

Edit Record

In order to edit the Record you need to highlight it and in right panel select field, which you want to edit. In order to select field in the right window panel you need to doubleclick on it with your PC mouse.
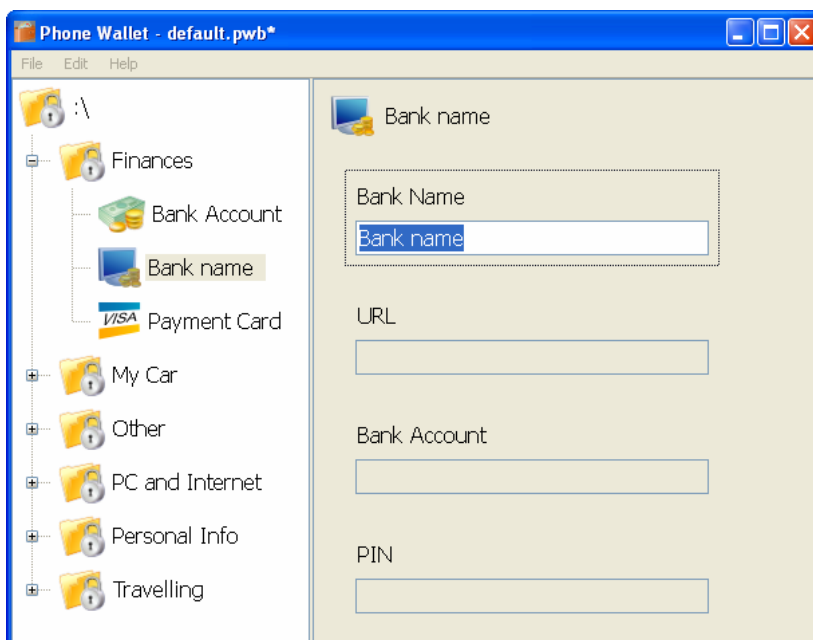

New Folder

All secure data in Phone Wallet for PC application are gathered into folders.
To create new Folder you have to click button Edit → Create folder and enter new Folder name or by clicking right mouse button on folder to call popup menu after that you should select Create folder item .

New Record

Every Folder consists of records. The number of records in one folder is unlimited.

To create new Record you have to click button Edit → Create record or by clicking right mouse button to call popup menu after that you should select Create record item. To get the newly-created Record you have to choose record type depending on the data type and enter Record name:

1. Record Name – to indicate name of the definite record
2. Record Type, depending on the type of information:
   - Default
   - Address
   - Bank Account
   - Calling Card
   - Car Info
